## ART PROJECTS

### ANNE-MARIE FISCHER

Born:  
1963 in Paris, France

Lives:  
Zurich, Switzerland

Education:  
1990 Master of Science in  
Architecture, ETH Zurich,  
Switzerland

Anne-Marie Fischer is a Swiss artist whose works are characterized by a clear, abstract visual language featuring geometric and spatial compositions that tend increasingly toward the organic. Fischer's work explores the interactions between figure and ground, surface and space, mass and lightness, movement and calm. She works across a variety of media, such as painting, printmaking, collage, sculpture, and relief. Her projects also include space-related wall paintings and site-specific installations for both interior and exterior spaces. Before dedicating herself to a full-time career as a visual artist, Fischer worked as an architect for 20 years, which informs her practice in a multitude of ways. Alongside her practice, Fischer taught at the "Haus der Farbe" for several years, a school for color designers.
