PATRICIA SANDONIS

Born:
Born in Valladolid, Spain.

Lives:
Berlin, Germany

Patricia Sandonis' multidisciplinary practice draws from socio-political contexts, personal biography, and collective cultural memory. Her drawings, objects, and installations reposition and question societal and political norms and the way culture is memorialized. Her work often contains visual references to structures and objects that shape public space, such as stone columns, temporary fences, or graffiti.

Sandonis was born in Valladolid, Spain, and lives and works in Berlin. She has shown in numerous solo, and group shows across Europe and is the recipient of various grants and artist residencies. Her work is housed in several Spanish public collections.
